The various finishes and colors allow the unique character of the Swisspearl panels to be expressed in an almost endless diversity. The carefully chosen full-body color and color finishes, each in their own way, emphasize the unmistakable aesthetics of the material, combined material and color to form a complete building envelope.

- Unique natural look and timeless beauty. The translucent lightly pigmented finish adds a distinguished expression.
- Unique interplay of light and shadow. The linear, geometrical grooved surface offers countless options for making a special statement.
- **D** Naturally authentic, rough, lively and unique. The sanded surface highlights the purity of the fiber cement panel.
- **D-** Rough, lively with a shiny look. Vintago-Reflex has a sanded surface combined with a reflective surface giving a slightly rough, yet lively, shiny look.

Stylishly authentic with a vivid spreading pattern. This fiber cement panel has a quality granulated marble that creates a unique and dynamic look.

Authentic and vibrant appearance. The transparent coating lets the original natural look of the fiber cement shine through.

- Shiny look with metallic character. The reflective surface coating gives the panels a sophisticated, shiny look.
- Authentic fiber cement look. The translucent lightly pigmented surface highlights the fiber cement texture in its natural beauty and elegance.
- Earthy and warm atmosphere. The finely coordinated colors are a reminiscent of earth tones and gives the building envelope an earthy, natural look.
- Fresh and colorful creativity. The matte and smooth finish emphasizes the clear, bright and strong colors for an overall intense appearance.

## Customized colors:

Swisspearl has an unmatched competence and knowledge regarding special colors.

The printed colors may differ from the original shade of the color. To see the exact color, and when matching up colors on adjacent parts of a building, one must use the original panel samples. The natural ingredients used in the fiber cement panels will to some extent determine the unique character of the material. The intensity and color tone may vary slightly depending on the production batch.
